

POCKET 180

Pocket 180 is the smallest ever Pocket system and is designed for any home, studio or performance application where superb high definition audio is required. The subwoofer includes a variety of input options for direct input but also allows the use of an

external mixer if required. The 180 is a great choice for instruments, multimedia applications and studio monitoring and with such flexibility can become the centre of your entire audio world. The 180 is finished in black lacquer or polished wood
