SAM 300A

SAM 450

SAM 450A

Superior Sound - Superior value

Built in Italy and designed in Austria, Red Beat offers high quality European audio performance and build quality for the widest possible number of performing musicians. With their lacquered paint finish, ply cabinets and premium quality hardware, every Red Beat product will survive years of the most demanding use in any performance situation.

Active speakers have become increasingly popular in the last few years and both the models from Red Beat combine low weight, dynamic performance and amplifier designs that outperform

products costing considerably more. Just add the mixer of your choice to either of these cabinets and you have a PA system that is sonically accurate with a rich tonal quality, easy to set up and exceptionally powerful.

The SAM 300A combines a "12" woofer and "1" horn with 300W RMS of bi-amplified output and has the classic speaker configuration so popular with artists who require full range performance in the most compact cabinet design. Ideal for solo performers, bands and DJ's the SAM 300A is equipped with enough power to cope with a

wide range of venues and musical styles. Its larger brother, the SAM 450A combines a "15" woofer and "1" horn and a full 450W RMS per cabinet and is ideal for those who require extra bass response and output yet still require exceptional portability

SAM 300A TECHNICAL SPECIFICATION

OUTPUT: 300W
SPEAKER: '12" WOOFER "1' HORN
CONNECTIONS: XLR AND JACK
CONTROLS: VOLUME AND GROUND LIFT SWITCH
FREQUENCY RESPONSE: 45-20000HZ
